The **RAY Battery** is a **buttonless**, inhale-activated vape battery that comes retail ready in individual boxes. It features a rechargeable 350 mAh battery that comes with a micro USB charger that quickly charges the battery. On the bottom of the battery is an LED light that lights up while both charging and being activated through inhaling. This battery is made to pair with any universal 510 thread cartridge.

The **RAY Battery** is easy to use and discreet for on-the-go vaping and is easily storable in a pocket or bag. The **RAY inhale-activated battery** we carry provides a consistent, smooth vaping experience, that has button-free activation & is easy to use!
