# TAO (DQT1) QUARTZ AIO

*Same oil, better flavor, happier customers!*

Quartz Atomizer Technology is the next step in the cartridge evolution, it's the most modern & flavorful way to vape! Our Quartz Cartridges feature our patented quartz atomizer and filter system that enhances oil flavor while reducing leakage and damage. Our stock Quartz Cartridges can also be fully customized to suit your branding needs.

## The Best Flavor Profile on the Market

Thanks to the natural properties of quartz, quartz atomizers provide superior flavor and consistent vapor production from the very first puff to the last.

*Atomizers made of non-quartz materials tend to wear down faster, releasing particles into the vapor and altering the oils' natural flavor.*

## Handles Almost All Ranges of Viscosity

Our patented microporous filtering technology allows processors to use a single cartridge style for multiple oil types. Our quartz filters are designed to only allow vapor to pass through, greatly reducing the risk of leaks.

*Many cartridges currently in the market require adjustments to accommodate oils with different viscosities, but our patented technology eliminates this need and allows for seamless use with various oil types.*

## Superior Heating Element

Due to quartz's crystalline structure, it naturally conducts heat while using less energy compared to other atomizers on the market.

*Since quartz has equally-sized pores, it allows the atomizer to heat up and vaporize the oil more evenly with less energy, resulting in a smoother vaping experience without any burnt hits.*
