BEAR ROOTZ'S

Sol

BATTERY

The **Sol Battery** is a **button-activated** device with 350 mAh battery capacity that is perfect for vaping thick or thin concentrate oils in compatible 510-threaded cartridges. It's compact design makes it great for those who are on the go!

PRODUCT FEATURES

Discreet and Portable

The Sol Battery is a great choice for those who want an impactful vaping device with easy storage and quick access throughout the day.

3 Variable Settings

The Sol Battery has three voltage options that allow you to choose the perfect heat setting for you: 2.7V, 3.1V, 3.6V. Just simply click through the settings with the button.

Button-Activated and Rechargeable

The button on the Sol Battery allows you to pick the settings that best fit your preferences by just a simple click of a button! This vape battery also comes with a micro-USB charger cable that quickly charges the battery by connecting to the port located on the bottom of the device.

Short Circuit Protection

The Sol Battery includes overcharge protection to provide a safe and efficient vaping experience.

BEAR ROOTZ'S

Lotus

BATTERY

The **Lotus** Battery is a **button-activated device** that comes in a slim design that allows it to be easily storable. With a range of adjustable features, this battery is a great option for easy, everyday use!

PRODUCT FEATURES

Sleek and Discreet

Its slim design allows the Lotus Battery to be stored easily in easily accessible places such as a pocket or bag.

3 Temperature Settings

The Lotus is a button-activated battery that comes with 3 temperature settings, which can be adjusted by simply twisting the bottom of the pen. Variable voltage settings range from 3.3V-4.8V.

Customize Your Experience

The 510-thread at the port of the Lotus Battery makes it compatible with 510 Cartridges, along with having adjustable variable voltage. This allows for variation in types of oils and live resins used in cartridges compatible with the Lotus.

Rechargeable and Reliable

The Lotus is a 300 mAh capacity battery that is quick-charging for daily use. The Lotus can be recharged with the included 510-threaded USB chargehead by screwing it into the battery's port.

Safety is Prioritized

With an Auto Safety shut-off feature and overcharge protection, our Lotus Battery is guaranteed to make the user's experience safe and easy!

DIAGRAMS: LOTUS BATTERY

1	Electrode Pin	5	Condensed Cotton	8	O-Ring	11	Rivet Plastic Piece
2	Silicone	6	Quartz Disc	9	Ceramic Center Post	12	Mouthpiece

The **Lotus Battery** comes in a slim, discreet design that is easily storable in a pocket or bag. This battery is **button-activated** and has three temperature settings that can be changed by twisting the bottom of the pen. This feature takes the guesswork out of setting **custom voltages**.

The **variable voltage** settings ranging from **3.3 volts up to 4.8 volts**, allowing for more variation in the types of oils and live resins used in the cartridges that are paired with the Lotus Battery. Rechargeable, the Lotus battery comes with a USB charge head that screws directly into the top of the battery using the 510 thread port designed for cartridges. Safety features such as an auto-off after 15 seconds of static time and overcharge protection are what make the battery safe and easy for everyday use.
